Software Deployment Checklists / Rollout Plans

The deployment plan outlines the scope, approach and execution planned for the deployment of the project deliverables. The plan includes, where relevant, information about system support, issue tracking, escalation processes, roles and responsibilities before, during, and after deployment. The deployment plan is intended to provide clients, stakeholders and support personnel with a smooth transition to the new product or software being deployed.

Installation and Deployment Guide

The document in this file is an annotated outline for specifying software requirements, adapted from the IEEE Guide to Software Requirements Specifications (Std 830-1993). Tailor this to your needs, removing explanatory comments as you go along. Where you decide to omit a section, keep the header, but insert a comment saying why you omit the data.

Software Requirements Specification (SRS) Template

This document is comprised of two sections (in addition to the project identification information) the Deployment Strategy and the Deployment Plan. The Deployment Strategy section is used to formulate a deployment approach for the software application/system and is completed early in the project. The Deployment Plan section contains detailed schedule, resource, technical, and support information necessary for successful deployment of the software application/system.

Introduction Software deployment is a big deal; without it, you wouldn't be able to push any updates, fix any bugs or, hell, even push your product live in the first place! So, understandably, it can be pretty brutal when something along the line goes wrong. Whether it falls down to a lack of proper testing or neglecting to run required DevOps scripts, deployment isn't something that you can ...

Software Deployment | Process Street

The term deploy is often used interchangeably with the words release and ship, but they don't mean exactly the same thing. Deployment represents the installation or running of a new version of code on a server — going “live” with the software. This deployment may occur on a testing server rather than a production server.
