Global Surgery And Public Health

As Paul Farmer described it, "Global surgery is the neglected step-child of global public health." Without a doubt, that was true when he said it a few years back and continues to be true, though there is finally progress being made.

Global Surgery and Public Health: A New Paradigm ...

"Surgery's critical role in global public health is only now becoming appreciated and understood. Drs. deVries and Price elegantly synthesize the evidence on this subject and make the compelling case that greater investments in surgical care will have a transformative effect on all of global health.

Global Surgery and Public Health: A New Paradigm

According to The Lancet's Global Surgery 2030 report, more than five billion people lack access to safe, affordable surgical and anesthesia care when needed. Meeting the actual global surgical disease burden would require adding a minimum of 143 million operations every year, primarily in the poorest regions of the world where there is a severe deficit in healthcare workforce and infrastructure.

Global Surgery - Center for Surgery and Public Health

Global and Public Health The burden of surgical diseases, particularly trauma, is becoming increasingly clear to the public health community. Globally, 90% of trauma occurs in low- and middle-income countries, and at home, there are particular populations that are much more vulnerable than others.

Global Surgery & Public Health | UCSF Resident Research

The neglected stepchild of global health in Africa, surgery may be thought of as the neglected stepchild of global public health. There are fewer physicians per population on this continent than on any other; surgeons are rarer still, and almost all of them work in the urban enclaves of what remains a rural region.

Surgery and Global Health: A View from Beyond the OR

new model for surgeons' role in and commitment to the global health movement in Global Surgery and Public Health: A New Paradigm. The authors are not just scholars, but also compassionate surgeons personally building "sustainable capacity"—i.e., training local surgeons and medical professionals—in surgical programs around the world.

Global Surgery and Public Health

Despite such a surgical imbalance around the world, surgery is still "the neglected stepchild of global health". 4 No global funding organization focuses specifically on the provision of surgical care, and none of the major donors are willing to support and acknowledge surgery as an imperative part of global public health.

WHO | Surgery as a public health intervention: common ...

At the very core, global surgery is "a field that aims to improve health and health equity for all who are affected by surgical conditions or have a need for surgical care, with a particular focus on underserved populations in countries of all income levels, as well as populations in crisis, such as those experiencing conflict, displacement, and disaster."

GSSA | What is global surgery?

Surgical care is often perceived as too expensive to implement, but is similarly cost-effective to currently implemented non-surgical routine interventions. The World Health Organization aims to advance the status of surgical care in global public health and coordinate plans to address the unfulfilled surgical burden.
