Examples of the root locus techniques. The roots of the
characteristic equations are at s=-1 and s=-2.5±j5.8 (i.e., the
roots of the characteristic equation s 3 +6s 2 +45s+40), so we
might expect the behavior of the systems to be similar.Since the
pole at s=-1 is closer to the origin, we would expect it to
dominate somewhat, giving the system behavior similar to a first
order system with a ...
